

CAREER ROADMAP:

Agriculture

Description of Field:

Careers in the agriculture industry vary and includes food and non-food related productions, farming, and agricultural communications. Jobs within the subsectors of agriculture are broad depending on season and location. Many agricultural fields work with other disciplines such as engineering, business and education.

General Skills:

Working in the agriculture industry requires keen observation to change and patterns, vast knowledge in environmental and biological sciences, critical thinking and problem solving skills, and the ability to prioritize and organize projects

Insider Advice:

Working in the field of agriculture requires a vast knowledge of many subject areas minors in business, economics or other science can be beneficial. Gain experiences by volunteering and interning in multiple environments and location to help identify sectors of interest.
